Steps In The Green Direction

Posted: June 1st, 2012

EDC Las Vegas 2012 Fueling Up With Biodiesel:

In an effort to reduce our carbon footprint and use domestically-produced energy, EDC Vegas will be using B20 biodiesel this year in most of our generators. Biodiesel is American-produced fuel made from non-petroleum, renewable resources and emits less air pollutants (other than nitrogen oxides) and greenhouse gases.

EDC Las Vegas 2012 Recycling Program- Help us Dance Green!

Be a part of the Dance Green Team! We will have recycling bins all over the place - at the entrance gates, by the water refill stations, at the concession stands. Our recycling bins will be next to the Landfill bins marked with big recycling logos, so please put your cans, bottles and plastic cups into the recycling bins. We will be sorting through every bag to collect and weigh as many recyclables as possible. Help us to recycle and make EDC Vegas 2012 the most sustainable ever!
